PRODUCT PROGRAM

Manufactured in the Sultanate of Oman

GRP PORTABLE TOILET

Features:

- It is a standalone product, as it requires only a small piece of level ground
- Overall size: 1.150m width x 1.150(+footstep 450mm) m length x 3.350 m height without pallet and 3.500m with bottom PE pallet.
- 100 USG PE overhead tank. 150 USG holding tank underneath. Utility compartment in the middle, which can be equipped as required.
- Requires occasional filling with fresh water tanker and evacuation of holding tank by a standard vacuum tanker.
- Strong, durable and beautiful product. Light in weight and transportable (when empty) with ease. Fork lift truck or a Hiab truck required or 5 people can also displace it easily. Not dependant on electricity for its operation.
- All GRP construction, absolutely free from corrosion and maintenance hassles.
- Self extinguishing grade of GRP material to DIN 4102 class B2.
- Islamic community appreciates these units since there is provision of fresh water for cleaning and flushing.
